This decision is based on our finding from:

Washington State law which directs that the true and fair market value of property shall be based upon sales of the subject property, or sales of comparable properties, made within the past five years, cost, cost less depreciation, reconstruction cost less depreciation, or capitalization of income. "True and fair" value is market value; that is, the price to be paid by a willing buyer to a willing seller.

Washington State law further stipulates that the assessment determined by the County Assessor is presumed to be correct and can only be overcome by presentation of clear, cogent and convincing evidence that the value is incorrect.

The issue before the Board is the January 1, 2015, true and fair market value. A hearing was held on February 12, 2016 before the Board of Equalization. The appellant, Curtis Morris, was not in attendance at the hearing and the Assessor's office was represented by Melissa Hortiz, Chief Analyst.

The Assessor valued the property at \$1,602,300 for the 2015 assessment year. The owners appealed, asserting a value of \$1,557,000.

The subject property is located within the city limits of Quincy that is zoned residential. Subject property is 77.85 acres. The parcel is currently being used for agricultural purposes and is in the current use program, with a current use value \$139,705.

The appellant's stated in the petition the reason for the appeal was that value given has not been adjusted for the lack infrastructure nor for location. Property same zone across the highway is marketed at \$15,000/acre with no sales. The appellant also submitted their Change of Value notice letter dated 8/31/2015. Mr. Morris submitted additional evidence to the board clerk, this information included an appraisal that was dated Sept. 30, 2010. Mr. Morris also included a letter to the board with a description of the subject parcel.

The assessor representative submitted information to the board and the appellant. This information included a Quincy zoning map, 4 development potential land sales used for the Sales Comparison Approach. The subject has been valued at the set development potential rates for Quincy, but due to location an adjustment of -50% was applied to the subject.

The Board finds the arguments presented by the appellant are not substantial enough to meet the clear, cogent, and convincing standard of proof necessary to offset the presumption of correctness established under RCW 84.40.0301. The Board finds the Assessor's Response to Real Property Petition dated December 30, 2015, which was mailed to the appellant and submitted as evidence in this hearing adequately reflect the subject's important value-related characteristics. Therefore, the Assessor's value is sustained at \$1,602,300. This property is currently zoned residential. If the Assessor's Office changes this parcel to light industrial which Mr. Morris states that it is, it would be valued at \$1,678,150 using the -50% adjustment that was used in the previous parcel. If Ms. Hortiz finds that it is zoned incorrectly she will change the value for 2016 assessment year going forward.
